Comment:

all animal testing should be stopped permanently and totally. none of it should go on at all anymore in the entire usa.

i wish to testify orally and written on this issue, which is animal abuse in labs for no responsible reason. the results from these animal tests are irresponsible and never result in drugs that are helpful to humans. they are an antiquated system from 1500 a.d. and still using them shows no advance from ages ago. we should have advanced in science from 700 years ago but have not and the ugly profiteers still continue this horrific practice with beagles having their voices taken away because they are in so much pain and the lab rats don't want to hear them it is ugly. it needs stopping and it needs stopping now. right now.

also i find that these intergovt "partnerships" that you are so fond of using has resulted in tests being done all over the world so that they are sneaky and nobody in america knows what our tax dollars are buying anymore. you are sending out tests to the furthest parts of the world where examples like wuhan show how plague driven your tests can fester. it is time to cut out all these alleged "partnerships" where you sneak off tests that nobody in america would pay for if they knew about them. you have sneak meetings that nobody in america can find out about until years later when the results come home to roost in plagues in america. you are promoting a health system that in fact has brought about the worst health in america than we have ever seen where citizens are dying at earlier and earlier ages due to research that is about giving millions to your pals in secrecy rather than in real research that results in any real results.

we have an epidemic of autism absolutely out of control where 1 in 14 boys are sick and unable to contribute to our nation. we have cancer at new highs every single year. cancers of every part of our bodies. obviously the research you are doing out is completely ineffective. america healthwise is in worse shape than it has ever been in its entire history. so that proves that your spending is absolutely the worst it can be.

we need a sea change here. we need animals out of the picture. we need this agency shut down if it can't show it has some real interest in helping america. our work is deserved of an f minus grade. f minus - actually it's a zero imo grade book.

this comment is for the public record. please receipt. this entire pandemic that seeks to castigate those who don't fall for the fake alleged science of mussolini fauci that prevented any early care of those afflicted with the flu and died on ventilators in the hospitals = we are fully awake to the incestuous relationship of how our monies are spent in this agency. it needs to change. this comment is for the public record. please receipt. jean public
