LEGEND

---

Mean feed consumption  $\pm$  standard error; mean calculated as grams/day/animal

N is the number of animals (excluding unweaned pups)

Statistical analysis performed by Jonckheere (trend) and Shirley or Dunn (pairwise) tests

Statistical significance for the control group indicates a significant trend test

\* Statistically significant at  $P \leq 0.05$

\*\* Statistically significant at  $P \leq 0.01$

Feed consumption is not reported for the non-pregnant animals during gestation and lactation phases

Feed consumption is not reported for animals during mating
