

Integrated Chemical Environment

Presenter: Dr. Nicole Kleinstreuer, NIEHS/DNTP/Interagency Center for the Evaluation of Alternative Toxicological Methods (NICEATM)

Launched in March 2017, ICE provides high-quality, curated data from NICEATM, its partners, and other resources, as well as tools to facilitate chemical safety assessment. The [ICE Integrator](#) allows users to easily query and integrate data streams; query results can be explored interactively in table and graphic views.
