
NATIONAL TOXICOLOGY PROGRAM
Peer Review of Draft NTP Monograph on the Developmental Effects
and Pregnancy Outcomes Associated with Cancer Chemotherapy
Use during Pregnancy
October 1-2, 2012 Meeting

The peer review panel's charge is to:

- (1) determine whether the scientific information cited in the draft monograph is technically correct, clearly stated, and objectively presented

- (2) determine whether the scientific evidence presented in the draft NTP monograph supports the NTP's interpretation of the developmental effects and pregnancy outcomes associated with cancer chemotherapy use during pregnancy
