

Peer Review of the Draft Report on Carcinogens (RoC) Monograph on Night Shift Work and Light at Night

National Institute of Environmental Health Sciences
Research Triangle Park, NC

October 5, 2018

Charge to the Panel

- 1) Comment on whether the Draft RoC Monograph on Night Shift Work and Light at Night is technically correct, clearly stated, and objectively presented.
- 2) Provide opinion on whether a significant number of U.S. residents work (or formerly worked) night shifts, and are (or were in the past) exposed to light at night.
- 3) Vote on whether the scientific evidence supports the level of evidence conclusions regarding carcinogenicity from studies in humans.
- 4) Vote on whether the scientific evidence supports NTP's preliminary policy decision on the listing status in the RoC of
 - a) Persistent night shift work that causes circadian disruption.
 - b) Certain lighting conditions that cause circadian disruption.
