

Peer Review of Draft NTP Approach to Genomic Dose-Response Modeling

Peer Review Charge October 23–25, 2017

The expert panel is charged to:

- (1) Review the proposed approach.
- (2) Recommend whether NTP should use the approach.
- (3) If recommended for use, identify any needed modifications or additional studies that would improve the approach.

If the expert panel does not recommend use of the proposed approach, they are asked to:

- (1) Propose an alternative approach, if readily available.
- (2) Identify the elements that should be included in an alternative approach.
