3Rs Organizations in NA Can Help – Refinement & Communication

- Roadmap is heavy on Reduction and Replacement, but what about Refinement?

- Strategic Road Map Outline - “Develop mechanisms to improve communication between end-users and researchers.”

Refinement's Place in the Roadmap to New Approaches in Toxicology Research and Studies

- **Depression / Morbidity / Death**
- **Clinical Pathology (Liver Enzymes, Renal Chemistry, Hematology)**
- **Limited Physiologic Parameters (EKG, Ophthalmology)**
- **Better or Surrogate Endpoints = Refinement**

ADVANCING SCIENCE, INNOVATION AND WELFARE THROUGH SHARING

What is the NA3RsC?

- **Mission/Statement of Purpose**

- The mission of the NA3RsC is to advance the science of the 3Rs – replacing, reducing and refining the use of animals in research.
- Our strategy includes:
 - Raising awareness of current 3Rs technologies and approaches
 - Fostering networks and collaborations focused on the 3Rs
 - Acting as a clearinghouse for information on the 3Rs
- To do this we work across the scientific community with researchers from academia and industry, veterinarians and animal care staff, policy makers, regulators and funders.

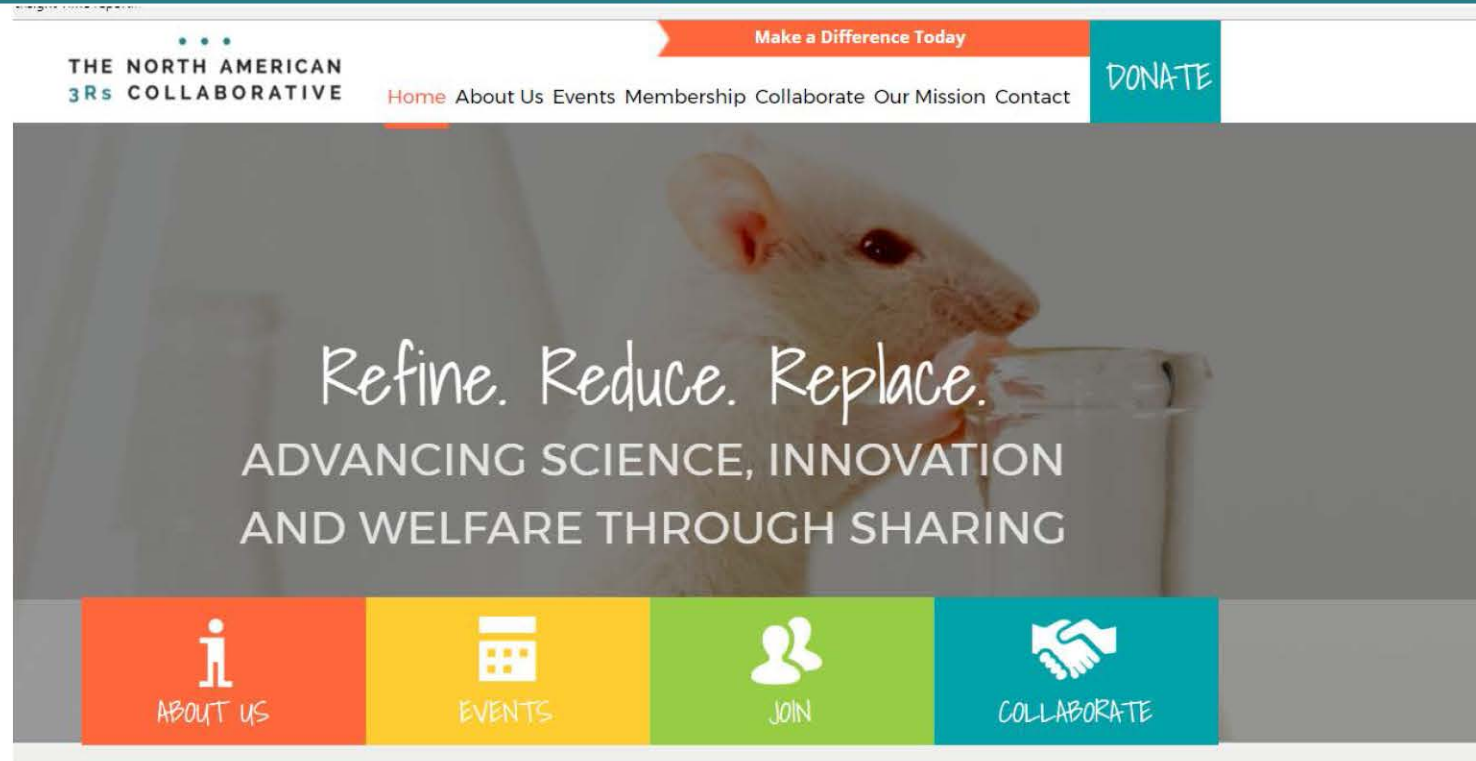

Collaborative not Competitive!

Building a virtual 3Rs community...

- **A Dynamic, Interactive, and Evolving Community**

- Theater to present educational symposiums live
- 3Rs community pavilion
 - (a resource hub / portal to all North American 3Rs communities who participate)
 - Links to useful information
- Platform to discuss and solve topical issues
