

Peer Review of the Draft NTP Technical Reports on Cell Phone Radiofrequency Radiation

Chad Blystone, PhD, DABT
Toxicology Branch

National Institute of Environmental Health Sciences

NTP Technical Reports Peer-Review Meeting
March 26-28, 2018

National Toxicology Program (NTP) Technical Reports

- NTP conducts rodent toxicity and cancer studies on agents of public health concern to identify potential hazards for human health
- NTP technical reports describe the methods, results, and NTP conclusions as “levels of evidence” for carcinogenic activity under the specific conditions of the study

- Toxicology and Carcinogenicity Studies in B6C3F1/N Mice Exposed to Whole-Body Radio Frequency Radiation at a Frequency (1,900 MHz) and Modulations (GSM and CDMA) Used by Cell Phones
- Toxicology and Carcinogenicity Studies in Hsd:Sprague Dawley SD Rats Exposed to Whole-Body Radio Frequency Radiation at a Frequency (900 MHz) and Modulations (GSM and CDMA) Used by Cell Phones

Charge to the Panel

- Assess the reverberation chamber technology for evaluating the effects of cell phone radiofrequency radiation exposure in rats and mice
