

Peer Review of the Draft NTP Technical Reports on Cell Phone Radiofrequency Radiation

Non-Technical Public Comments: Received February 23, 2018

Shannon Weckman Private Citizen	<p>I am very concerned over the rollout of wireless technology especially since adequate studies have not been done to determine health safety. Wireless technology may affect our brain, nervous system, resulting in anxiety, depression, autism, Alzheimer's, autoimmune disease and much more. Our health is being put at risk for corporate profits. The government agencies that are supposed to protect us have been taken over and run by corporations and as a result make decisions favorable to corporate profit. What a sad state of affairs that a civilization puts profit before the health of its citizens especially children. I am convinced that microwave RF does damage to living organisms and is why I now live in [REDACTED] [REDACTED] and I do not have a smart meter or any wireless devices in my home.</p> <p>Love, Peace, Freedom,</p> <p>Shannon Weckman</p>
Petrina Gregson Private Citizen	<p>It is time for governments to stand up for the people and stop kowtowing to the telecommunication industry. The BioInitiative Report gave the warning several years ago. The NTP research has given clear evidence that EMF is hazardous to our health, and should be rated as a probable carcinogen. Our [REDACTED] was diagnosed with [REDACTED] at [REDACTED] he is an urban dweller and up to then had been active and healthy, although a cell phone user. Many people can't afford a land line and a cell phone; we can expect more cancer and brain tumours as the telecom industry pushes cell phones on the public without the public being aware of the dangers. 5G technology is only exposing more people to more radiation.</p> <p>https://articles.mercola.com/sites/articles/archive/2018/02/21/cellphone-radiation-linked-to-tumors.aspx?utm_source=dlvr.it&utm_medium=twitter</p> <p>Children are a country's greatest resource, yet we are irradiating them daily with wifi in the schools. Hard-wired technology is more secure and faster than wireless technology, and less expensive in the long run. I and my [REDACTED] have moved from a city to a [REDACTED] but few people have that luxury. Please step up to the plate and at least put a moratorium on the 5G technology. More and more independent studies are showing the dangers, even as industry-bought scientists try to refute them.</p> <p>Sincerely, Petrina Gregson, [REDACTED]</p>
Ken and Bernadette Ayre Private Citizens	<p>We Protest the massive whitewashing that is being catalyzed by the telecommunications industry to suppress the truth and expose us and our family to dangerous levels of EMF so they can increase their profits.</p> <p>Save us. Stop destroying us.</p> <p>Sincerely,</p>

	<p>Ken & Bernadette Ayre [REDACTED]</p> <p>ELIMINATE High Fructose Corn Syrup ELIMINATE GMOs</p>
<p>Ess S. Private Citizen</p>	<p>Read this! Having read it myself, and lots more re: cellphone toxicity over the years, I register my protest of this insidious technology that is toxifying humanity, the environment, and all life! Measures MUST be taken to address and deal with this egregious assault on biological health:</p> <p>https://articles.mercola.com/sites/articles/archive/2018/02/21/cellphone-radiation-linked-to-tumors.aspx?utm_source=dnl&utm_medium=email&utm_content=art1&utm_campaign=20180221Z1_UCM&et_cid=DM187615&et_rid=221759811</p> <p>U.S. citizen [REDACTED]</p>
