<i>Laura Henze</i> Private Citizen	<p data-bbox="443 272 516 297">Hello!</p> <p data-bbox="443 306 1860 370">I am writing to express my concern over the lack of regulations related to technologies, including cell phones and smart meters, that emit harmful radiation.</p> <p data-bbox="443 412 1902 475">In particular, having just been required to get a smart meter on our electric box, I am concerned for people's safety with all that these meters are emitting.</p> <p data-bbox="443 518 1913 654">Citizens should be educated and given clearer opportunities to opt out or the electric company and other providers should be required to offer, at no charge to the consumer, a case to protect against emissions. Currently, even if I chose to pay the \$150 to outfit my smart meter with protection, since my entire [REDACTED] has one, we will all continue to be exposed to the emissions. I am hoping for your support in righting this Wrong.</p> <p data-bbox="443 696 590 755">Thank you, Laura Henze</p>
