

Peer Review of the Draft NTP Technical Reports on Cell Phone Radiofrequency Radiation

Non-Technical Public Comments: Received February 26, 2018

Name, Affiliation	Comment
Felicity Lillingston Private Citizen	I'm very concerned about cell phone exposure and demand that the true results of the recent study be exposed ASAP! I'm a health care practitioner and am alarmed that the government is not doing more to protect the public from the potential damage from over exposure to cell phone radiation ! Yours Felicity Lillingston
Tara Bohan Private Citizen	I request that more research is put into the effect sof radiation form cellular phones and that we question the telecommunications corrosive influence on resear4ch and studies.. Thank you
Suzanne T. Payne Private Citizen	Gentlemen, I would like to know why the 2016 study that revealed the possible carcinogenic effect of cell phones, as well as the possibility that they cause a weakness in the blood brain barrier has been buried.It is clear that there is a possible connection between cell phones and I'm number of diseases, including cancer and heart disease. Please don't allow America's penchant for big business, ie, telecommunications, to negate health findings! We need to be warned of potential dangers. That is not to say we will give up our cell phones, but we will use the more wisely. Please accomplish your purpose! Suzanne T. Payne President, Women's Committee [REDACTED] [REDACTED]
