

Peer Review of the Draft NTP Technical Reports on Cell Phone Radiofrequency Radiation

Non-Technical Public Comments: Received March 7, 2018

Name, Affiliation	Comment
<p><i>Kay Samalin</i> Private Citizen</p>	<p>I am aware and want you also to be aware of the massive whitewashing that is being catalyzed by the telecommunications industry to suppress the truth that EMF levels are dangerous to people using cell phones. People need to be aware of this so they can make their own decisions about cell phone use.</p>
<p><i>Barbara Savoie</i> Private Citizen</p>	<p>I want to share with you my recent letters to Michigan Energy Committee legislators about the harm caused to me by radio frequency radiation from smart meters and encourage them to pass legislation to allow us to keep our analog meters and to vote against %G radiation. You might think I'm exaggerating about a reaction to the meteor that fell in MI. I told my [REDACTED] in [REDACTED] the next morning after it happened. I told another [REDACTED] a couple of days later. She asked me if I knew a meteor had fallen by Detroit a couple of days ago. When I looked it up on the computer, sure enough it was the same time I had the symptoms.</p> <p>SUBJECT: "The greatest polluting element in the earth's environment is the proliferation of electromagnetic fields".</p> <p>January 29, 2018</p> <p>Dear Representative:</p> <p>FOR YOUR INFORMATION:</p> <p>I do not want to appear grandiose but I don't think many could have lived through the 50 years of intense suffering that I have been through. I have to believe God meant it for something good. I could never understand why I was allergic to everything after a [REDACTED]. I was even [REDACTED] then to electric blankets and heating pads and florescent lights in stores. I knew I had [REDACTED] soon after the [REDACTED] as I [REDACTED] to everything, even newsprint. I definitely had to live a [REDACTED], but I never considered an [REDACTED] until smart meters were installed in 2014-2015 and I became [REDACTED] to everything wireless. Because of my experiences, and reading the research, I knew by 2016 I had [REDACTED]. Why did I survive so many [REDACTED] and all the [REDACTED] [REDACTED], chemicals, including chemicals in food, fuel exhaust along with the usual [REDACTED] [REDACTED] for [REDACTED] years? Because I am a spiritual person, I have to believe God allowed me to live to tell my story, that is well documented, and bring awareness to the harm caused by EMF's, which I probably would not have known if those smart meters hadn't caused me to have [REDACTED]. I relate to Joseph of the bible who saved the Jewish nation after he survived the evil intentions of his brothers to get rid of him. Something meant to harm, God meant for good. I don't believe anyone had evil intentions against me but greed has played a part in the decision making of EMF's. As of today, I can see the part electricity has played in my [REDACTED] and I know I was blessed to have made it to old age and tell my story, because I believe few would have done so. I [REDACTED] to that meteor falling to earth January 16th with [REDACTED] [REDACTED]. I told one of my [REDACTED] the next morning but it wasn't until a couple of days later I told another [REDACTED] and she asked me if I had known a meteor had fallen in Michigan. When I researched the meteor I found it was the exact time I had the symptoms. Who else reacts to Meteors? I would like to know! If my story can bring some good out of the [REDACTED] of 50 years, and prevent suffering and death to thousands of others because</p>

of the fact that I [REDACTED] and could not have told my story, then it is worth all the hardship I went through. Please take your responsibilities seriously.

I am saddened to think smart meters and 5G are being installed in our world. I'm hoping some better consciences will prevail. If there is no compassion and mercy for the most vulnerable in the country then what has our country become. I am one of the most vulnerable, being [REDACTED], so I am speaking out, for myself and those who are being affected but do not know it....especially the children, the ill, and the elderly.

Robert O. Becker M.D. (1923-2008) was one of the greatest Doctor/Researchers in the 20TH Century and he said this in 2000:

"The greatest polluting element in the earth's environment is the proliferation of electromagnetic fields".

I had to learn this the hard way as I am sure most of you will have to do. But think of this: Why are the Utilities and Communications Corporations under the Federal Communications Commission instead of the FDA? The FCC knows nothing about health. The standards they have for EMF's are only set for heating and shock. They know it's been proven that non-ionizing EMF'S cause DNA damage as well as damage to the DNA repair system among many other things. Therefore it can lead to diseases such as Autism, Alzheimer's, Parkinson's, MS, COPD, Chronic Fatigue, Cancer and many others, even though the tissue is not heated.

I have three [REDACTED] I believe that I can blame mostly on EMF's. It is in my records that I was [REDACTED] [REDACTED] in 1970. I did not think much about it until about 3 years ago when I became [REDACTED] [REDACTED]. I began to put two and two together and realized that being [REDACTED] probably had a lot to do with my [REDACTED] to just about anything and prevented me from ever attaining optimal health again.

I would say my [REDACTED] (diagnosed in [REDACTED] was from power line sources (probably my sewing machine as I sewed a lot). I read the book 'Dirty Electricity' by Dr. Milham, an epidemiologist, who meticulously recorded birth and death records and the cause of death. What he found out was childhood leukemia followed electrification. He had controls because the North was electrified before the South and the cities before rural America.

I also read that Russia beamed our embassy (I think in the 60's or 70's) with microwaves without us knowing it. Many of our people were getting ill with which was called microwave disease and some died of Leukemia including our ambassador. Also, the research studies done by Nancy Wertheimer and Ed Leeper in 1979, showed children living closer to power lines were getting Leukemia. These studies have been replicated recently, one being in 1988 sponsored by the New York Department of Health that supported their hypothesis. Other researchers confirmed their study.

Now I want to share another report of my [REDACTED] Diagnosis [REDACTED]

[REDACTED]

[REDACTED] [REDACTED] [REDACTED] [REDACTED]

[REDACTED] [REDACTED] [REDACTED] [REDACTED]

[REDACTED] [REDACTED] [REDACTED] [REDACTED]

[REDACTED] [REDACTED] [REDACTED] [REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

Please protect our nation from EMF'S!

Barbara Savoie

Another recent letter written to the MI committee of Technology and Energy to stop 5G.

March 6. 2018:

Dear Senator:

I strongly oppose SB 637. I am inclined to believe that our Representatives and Senators who are supposed to protect us are not doing their job. If you were you would be reading independent research concerning all this radiation being poured upon us and how it is negatively affecting our bodies. You could start with the Navy's research in the 1970's. You would be listening very attentively to all the peoples' complaints testifying in the committees, and voicing it on your phones and in your e-mails, who have been injured by smart meters, etc. You should support the health of the people instead of letting us be used as guinea pigs.

Therefore, to me the economy is only important in as far as it doesn't destroy our health and happiness, because I would rather have cold feet once in a while instead of what I have to endure today

██████████. In other words, the decision should involve the risk/reward ratio, and the reward should be directed toward the people rather than the corporations.

I'm not only a prisoner in my own house because of smart meters (my neighbors) and other wireless devices but I can't even use my ██████████ room where my comfortable chairs are. I have an RF meter and the radio radiation is continuous in there from my neighbor's smart meter and ██████████. ██████████

██████████ Consumers Energy and the MPSC have known of this problem I have with smart meters for over a year and have not been willing to work with me, in spite of all my correspondence with them. Many people are being affected by this wireless technology which is beginning to be known as the 21st century disease, which involves certain symptoms. They are not immediately sensitive to it ██████████ so they are not aware it is doing them harm. This is what the Bioinitiative Working Group reported:

In 2007, the Bioinitiative Working Group, an international collaboration of prestigious scientists and public health policy experts from the United States, Sweden, Denmark, Austria, and China, released a 650-page report citing more than 2,000 studies (many very recent) that detail the toxic effects of EMFs from all sources. Chronic exposure to even low-level radiation (like that from cell phones), the scientists concluded, can cause a variety of cancers, impair immunity, and contribute to Alzheimer's disease and dementia, heart disease, and many other ailments. "We now have a critical mass of evidence, and it gets stronger every day," says David Carpenter, MD, director of the Institute for Health and the Environment at the University at Albany and coauthor of the public-health chapters of the Bioinitiative report. (They also have a 2012 Bioinitiative Report)

Therefore, I urge the committee not to fast track this legislation and wait for new studies coming out that show direct links between 5G technology and serious health effects. Why would this bill make accommodation for historical districts and not address accommodations for public safety? Please do your just duty by being informed by independent researchers before allowing 5G. And as an afterthought, is anyone concerned with our food supply if our honey bees will be extinguished?

Sincerely,

Barbara Savoie
