## Peer Review of the Draft NTP Technical Reports on Cell Phone Radiofrequency Radiation

Non-Technical Public Comments: Received March 7, 2018

Name, Affiliation	Comment
Kay Samalin	I am aware and want you also to be aware of the massive whitewashing
Private Citizen	that is being catalyzed by the telecommunications industry to suppress the
	truth that EMF levels are dangerous to people using cell phones. People
	need to be aware of this so they can make their own decisions about cell
	phone use.
Barbara Savoie	I want to share with you my recent letters to Michigan Energy Committee legislators about the harm caused to me by radio
Private Citizen	frequency radiation from smart meters and encourage them to pass legislation to allow us to keep our analog meters and to
	vote against %G radiation. You might think I'm exaggerating about a reaction to the meteor that fell in MI. I told my
	in the next morning after it happened. I told another accoupte of days later. She asked me if I knew a
	meteor had fallen by Detroit a couple of days ago. When I looked it up on the computer, sure enough it was the same time I
	had the symptoms.
	SUBJECT: "The greatest polluting element in the earth's environment is the proliferation of electromagnetic fields".
	January 29, 2018
	Dear Representative:
	FOR YOUR INFORMATION:
	I do not want to appear grandiose but I don't think many could have lived through the 50 years of the second second that I
	have been through. I have to believe God meant it for something good. I could never understand why I was allergic to
	everything after a second se
	florescent lights in stores. I knew I had see the soon after the second as I see to everything,
	even newsprint. I definitely had to live a second second provide the second s
	meters were installed in 2014-2015 and I became to everything wireless. Because of my experiences, and reading
	the research, I knew by 2016 I had a . Why did I survive so many and a survive so many and all the
	, chemicals, including chemicals in food, fuel exhaust along with the usual
	for years? Because I am a spiritual person, I have to believe God allowed me to live to tell my story,
	that is well documented, and bring awareness to the harm caused by EMF's, which I probably would not have known if
	those smart meters hadn't caused me to have . I relate to Joseph of the bible who saved the Jewish nation after he
	survived the evil intentions of his brothers to get rid of him. Something meant to harm, God meant for good. I don't believe
	anyone had evil intentions against me but greed has played a part in the decision making of EMF's. As of today, I can see the
	part electricity has played in my and I know I was blessed to have made it to old age and tell my story, because I
	believe few would have done so. I to that meteor falling to earth January 16th with
	. I told one of my the next morning but it wasn't until a couple of days
	later I told another and the asked me if I had known a meteor had fallen in Michigan. When I researched the
	meteor I found it was the exact time I had the symptoms. Who else reacts to Meteors? I would like to know! If my story can
	bring some good out of the second of years, and prevent suffering and death to thousands of others because

of the fact tha	and could not have told my story, then it is worth all the hardship I went through. P
	onsibilities seriously.
	to think smart meters and 5G are being installed in our world. I'm hoping some better consciences will
	is no compassion and mercy for the most vulnerable in the country then what has our country become
one of the mos	t vulnerable, being <b>sector and the sector and speaking out</b> , for myself and those who are being affected bu
not know ite	specially the children, the ill, and the elderly.
Robert O. Beck	er M.D. (1923-2008) was one of the greatest Doctor/Researchers in the 20TH Century and he said this
2000:	
"The greatest p	olluting element in the earth's environment is the proliferation of electromagnetic fields".
I had to learn th	nis the hard way as I am sure most of you will have to do. But think of this: Why are the Utilities and
Communication	ns Corporations under the Federal Communications Commission instead of the FDA? The FCC knows no
about health. T	he standards they have for EMF's are only set for heating and shock. They know it's been proven that
ionizing EMF'S	cause DNA damage as well as damage to the DNA repair system among many other things. Therefore i
lead to diseases	s such as Autism, Alzheimer's, Parkinson's, MS, COPD, Chronic Fatigue, Cancer and many others, even
the tissue is not	
I have three	I believe that I can blame mostly on EMF's. It is in my records that I was
	in 1970. I did not think much about it until about 3 years ago when I became
l be	gan to put two and two together and realized that being second second probably had a lot to do
my	to just about anything and prevented me from ever attaining optimal healt
again.	
I would say my	(diagnosed in the ) was from power line sources (probably my sewing machine as I sewed a
read the book '	Dirty Electricity" by Dr. Milham, an epidemiologist, who meticulously recorded birth and death record
	ath. What he found out was childhood leukemia followed electrification. He had controls because the
	before the South and the cities before rural America.
I also read that	Russia beamed our embassy (I think in the 60's or 70's) with microwaves without us knowing it. Many
	tting ill with which was called microwave disease and some died of Leukemia including our ambassado
	ch studies done by Nancy Wertheimer and Ed Leeper in 1979, showed children living closer to power
	ukemia. These studies have been replicated recently, one being in 1988 sponsored by the New York
Department of	Health that supported their hypothesis. Other researchers confirmed their study.
Now I want to s	share another report of my Diagnosis.

Another recent letter written to the MI committee of Technology and Energy to stop 5G. March 6. 2018: Dear Senator: I strongly oppose SB 637. I am inclined to believe that our Representatives and Senators who are supposed to protect of are not doing their job. If you were you would be reading independent research concerning all this radiation being pout upon us and how it is negatively affecting our bodies. You could start with the Navy's research in the 1970's. You would listening very attentively to all the peoples' complaints testifying in the committees, and voicing it on your phones and
