<i>Heidi Schiebel</i> Private Citizen	EMFs produce damage to whom it may concern - Please be aware of this fact. Thank you. Hope we can do something about it.
<i>Delores Huajardo</i> Private Citizen	<p>I am very concerned about the amount of EMFs that our young people are unknowingly being subjected to. The telecommunications industry MUST be required to inform users of the possible health impacts that over use of cell phones, computers, i-pads, etc. may cause and how users can properly use and protect themselves from the overload of EMFs. Believe me, "the cat is out of the bag" and these prohibitions and cautionary measures will not negatively affect use of screen devices. It is the RESPONSIBILITY of the telecommunication industry to protect it users; in fact, the better health and longer lives of users will allow more discretionary money to be available for spending on devices and more years of life to purchase devices!</p> <p>In addition, RECOMMENDING PROPER USE OF TELECOMMUNICATION DEVICES AND PROTECTION FROM EMFs IS THE RIGHT AND ETHICAL THING FOR THE INDUSTRY TO DO. They will benefit in the long run.</p> <p>Thank you,</p> <p>Delores Huajardo, BS</p>
