National Institute of Allergy and Infectious Diseases; Notice of Closed Meetings

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. App.), notice is hereby given of the following meetings.

The meetings will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Institute of Allergy and Infectious Diseases Special Emphasis Panel, Systems Biology and Antibacterial Resistance (U01).

Emphasis Panel, Systems Biology and Allergy and Infectious Diseases Special Emphasis Panel.

APPLICATIONS.

Under section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. App.), notice is hereby given of the following meeting.

The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Institute of Allergy and Infectious Diseases Special Emphasis Panel, Systems Biology and Antibacterial Resistance (U01).

Nominations to the Report on Carcinogens and Office of Health Assessment and Translation; Request for Information

SUMMARY: National Toxicology Program (NTP) Office of the Report on Carcinogens (ORoC) and Office of Health Assessment and Translation (OHAT) request information on nine substances, mixtures, and exposure circumstances (collectively referred to as “substances”). Six substances are nominated for possible review for future editions of the Report on Carcinogens (RoC). Three substances are being considered by OHAT for evaluation of non-cancer health outcomes.

DATES: Deadline for receipt of information is November 6, 2015.

ADDRESSES: Information on substances for possible review for the RoC should be submitted electronically on the ORoC nominated substances page (http://ntp.niehs.nih.gov/go/rocnom) or to ohat@niehs.nih.gov. Information on OHAT nominations can be submitted electronically on the OHAT nominated topics page (http://ntp.niehs.nih.gov/go/763346) or to thoyer@niehs.nih.gov.
Six Substances Nominated for Possible Review for the RoC *

Flame Retardants
• Pentabromodiphenyl ether mixture (DE–71)
• Tetra bromom isphenol A, CASRN 79–94–7

Water Disinfection Byproducts
• Dibromoacetonitrile, CASRN 3252–43–5
• Di- and tri-haloacetic acids (as a class); specifically, those haloacetic acids with similar functional or structural properties that may cause similar health hazards

Other
• Fluoride, CASRN 7681–49–4
• Vinylidene chloride, CASRN 5–35–4

* Evaluations for the RoC may seek to list a new substance in the report, reclassify the listing status of a substance already listed, or remove a listed substance.

Three substances are being considered for OHAT evaluation of non-cancer health outcomes.

• Mountaintop removal mining (health impacts on surrounding communities)
• Neonicotinoid pesticides
• Fluoride (developmental neurotoxicity and endocrine disruption)

Information on RoC nominations should be submitted electronically on the ORoC nomination page (http://ntp.niehs.nih.gov/go/rocorn) or to thayer@niehs.nih.gov. Written information received in response to this notice will be posted on the NTP Web site, and the submitter identified by name, affiliation, and/or sponsoring organization.

Responses to this request for information are voluntary. This request for information is for planning purposes only and is not a solicitation for applications or an obligation on the part of the U.S. Government to provide support for any ideas identified in response to it. Please note that the U.S. Government will not pay for the preparation of any information submitted or for its use. No proprietary, classified, confidential, or sensitive information should be included in your response.

Background Information on ORoC: On behalf of NTP, ORoC manages preparation of the RoC following an established, four-part process (http://ntp.niehs.nih.gov/go/rocproc). The RoC is a congressionally mandated, science-based, public health report that identifies agents, substances, mixtures, or exposures (collectively called “substances”) in our environment that pose a cancer hazard for people in the United States. Published biennially, each edition of the RoC is cumulative and consists of substances newly reviewed in addition to those listed in previous editions. Newly reviewed substances with their recommended listing are reviewed and approved by the Secretary of Health and Human Services. The 13th RoC, the latest edition, was published on October 2, 2014 (available at http://ntp.niehs.nih.gov/go/roc13). The 14th RoC is under development.

Background Information on OHAT: On behalf of NTP, OHAT conducts literature-based evaluations to assess the evidence that environmental chemicals, physical substances, or mixtures (collectively referred to as “substances”) cause adverse non-cancer health outcomes. As part of these evaluations, NTP may also provide opinions on whether these substances might be of concern for causing adverse effects on human health given what is known about toxicity and current human exposure levels.

Dated: October 1, 2015.

John R. Bucher,
Associate Director, National Toxicology Program.
