**Re: Request for Public Comment on Nominations and Call for Additional
Nominations to the Report on Carcinogens – Pentachlorophenol**

Dear Dr. Lunn:

On behalf of the Pentachlorophenol Task Force, please find two reports of relevance to the public comment on Nominations to the Report on Carcinogens for Pentachlorophenol, 77 FR 2728 (Jan. 19, 2012):

1. A recent report by Dr. Robert Golden of ToxLogic, LC entitled “Proposed Listing of Pentachlorophenol (PCP) for Inclusion in 13th Report on Carcinogens (RoC).” The report reviews the most pertinent epidemiological data on pentachlorophenol.
2. A report by an expert panel that was submitted on July 6, 2009, to the U.S. EPA in connection with the then draft IRIS Toxicological Review of Pentachlorophenol. The expert panel report comments on the cancer slope factor for pentachlorophenol.

The Pentachlorophenol Task Force is interested in being kept apprised of the future work by DNTP on pentachlorophenol.

Thank you.

Sincerely yours,
[Redacted]

E. John Wilkinson
