

USDA NATIONAL AGRICULTURAL LIBRARY'S (NAL) ANIMAL WELFARE INFORMATION CENTER (AWIC)

May 19, 2023

For 2023 ICCVAM Forum

Presented By:
Jessie Carder, AWIC Coordinator

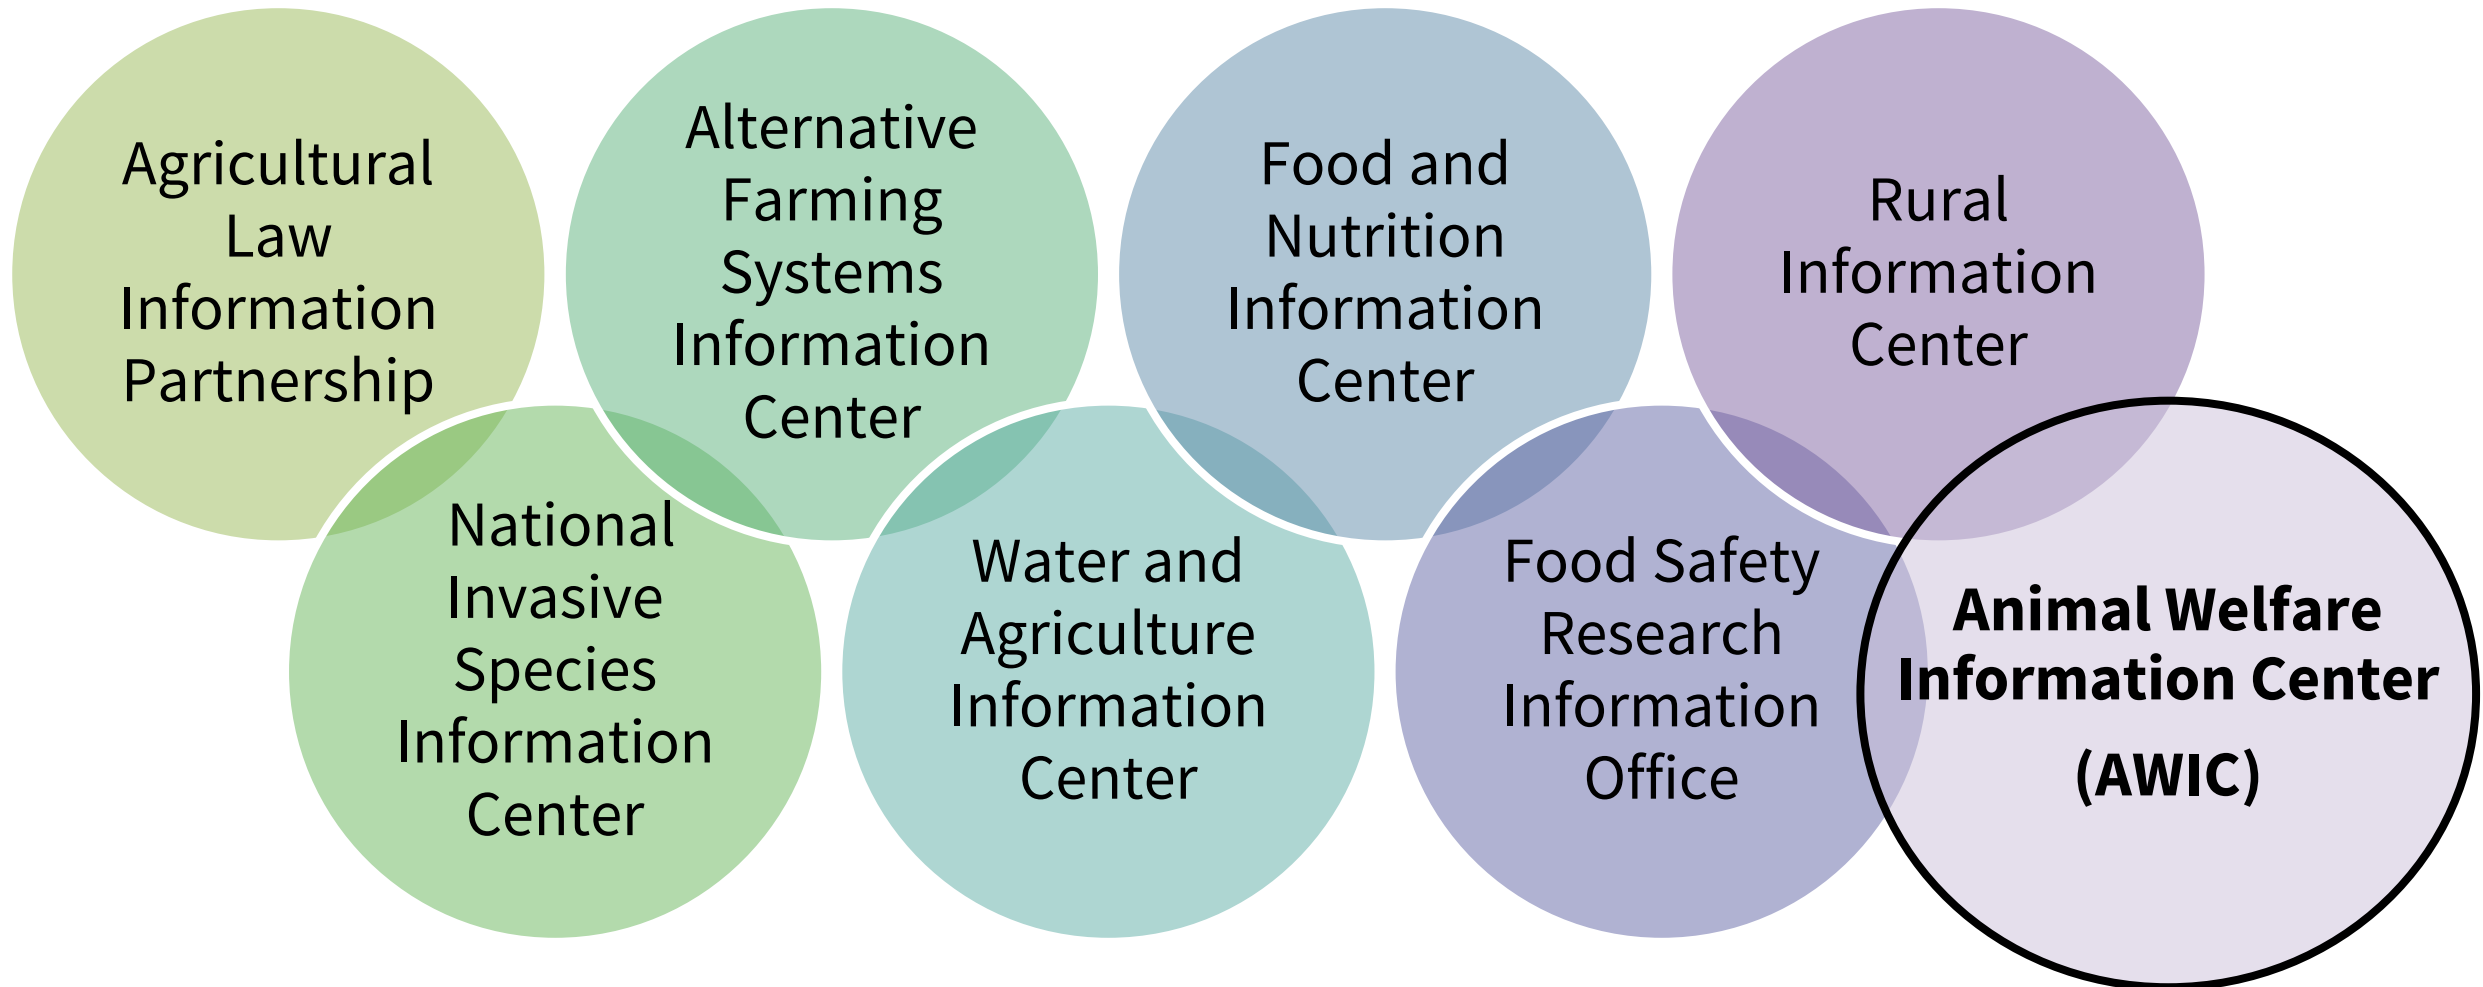

National Agricultural Library: Our Mission

“To facilitate the creation of agricultural knowledge through the acquisition, curation, and dissemination of the information needed to solve agricultural challenges today and in the future.”

NAL Information Centers

AWA Defines Service at NAL

(7 U.S.C. 2142, Sec. 13, Subsection e)

The Secretary shall establish an information service at the National Agricultural Library. Such service shall, in cooperation with the National Library of Medicine, provide information—

1. pertinent to employee training;
2. which could **prevent unintended duplication** of animal experimentation as determined by the needs of the research facility; and
3. on improved methods of animal experimentation which could--
 - (a) **reduce or replace animal use**; and
 - (b) **minimize pain and distress to animals**, such as anesthetic and analgesic procedures.

Required Contents for an Institutional Training Program

9 CFR Sec. 2.32 (c)

Employees must receive training in these 5 areas:

1. Humane animal handling and care methods.
2. Research or testing methods that limit the use of animals or minimize animal distress.
3. Proper use of anesthetics, analgesics, and tranquilizers.
4. Methods whereby deficiencies in animal care and treatment are reported.
5. Utilization of Services (e.g., **National Agricultural Library**, National Library of Medicine) to provide information regarding:
 - Appropriate methods of animal care and use.
 - Animal use alternatives in research.
 - Prevention of unnecessary duplication of animal research.
 - The intent and regulation of the Act.

AWIC's Products and Services

Animal Welfare Information Center (AWIC)

About AWIC

The Animal Welfare Information Center (AWIC) was established in 1985 as part of the U.S. Department of Agriculture's USDA National Agricultural Library (NAL) in Beltsville, Maryland. As a library service, AWIC provides information, products and services related to the improved care and use of animals in research, testing, and teaching as described in the Animal Welfare Act.

Key Products and Services

Animal Welfare Act Historical Digital Collection (AWAHD)

The AWAHD contains publications related to the Animal Welfare Act which fall into three categories: legislative history, regulatory history, and USDA publications.

Workshops on Meeting the Requirements of the Animal Welfare Act

AWIC's free virtual and in-person workshops focus on the Animal Welfare Act and its requirements, 3Rs alternatives, and

3Rs Alternatives Literature Search Support

AWIC provides free alternatives literature searching services, as well as instruction and best practices for performing an alternatives literature search.

Housing, Care and Welfare of Animals

What is Animal Welfare?

Animal welfare refers to how an animal copes with its environment. To assess an animal's well-being, you must consider multiple factors such as its biological functioning (i.e. health), emotional state, and its ability to express natural behaviors. It's important to provide animals with positive welfare to support their mental and physical needs and increase their quality of life.

Animal Welfare in Federal Regulations

To meet the requirements of the [Animal Welfare Act \(AWA\)](#), the regulated community (any personnel working with animals in research, teaching, and testing) must provide animals with adequate housing, nutrition, water, handling, ventilation, sanitation, and veterinary care (7 U.S.C. § 1752(a)(2)(2022)). The [Animal Welfare Information Center \(AWIC\)](#) is mandated under the AWA to provide information that helps the regulated community meet these requirements. The information below provides guidance regarding housing, care and welfare regulations for various species used in research, teaching, and testing.

Related Topics

These pages provide more detailed information about animal care and welfare.

Animal Welfare Act

The Animal Welfare Act (AWA) was signed into law on August 24, 1966. It is the only Federal law in the United States that regulates the treatment of animals in research, teaching, testing, exhibition, transport, and by dealers. The Act is enforced by USDA, APHIS, Animal Care.

The AWA has been amended numerous times since its original passage in 1966. The [Animal Welfare Information Center \(AWIC\)](#) was mandated under the AWA's 1985 amendment, 'Improved Standards for Laboratory Animals Act'. Therefore, as part of AWIC's mission, we provide information on the AWA to help people understand the law and its requirements.

Animal Welfare Act History Digital Collection (AWAHD)

The AWAHD contains U.S. Government publications related to the AWA that fall into three categories: legislative history, regulatory history, and USDA publications. Select the 4 resources to the right to read the original Act and some of its amendments.

[Read Other Publications in Our Collection](#)

Animal Welfare Act Timeline

Not sure where to start in our digital collection? Want a quick overview of the AWA and its amendments? Take a look at our [interactive timeline](#)! It highlights the amendments to the Act over time and shares a brief summary of how the law changed with each amendment. You can also view a [static version of the timeline](#).

3Rs Alternatives: Technologies and Approaches

"3Rs alternatives" refers to the **Reduction, Refinement, and Replacement** of animals used in research, testing, and education. The 3Rs concept was developed over 50 years ago by two scientists, Drs. William Russell and Rex Burch. It is first described in their published book, *Principles of Humane Experimental Technique*[®]. Russell and Burch advocated new scientific approaches that would minimize the pain and distress of research animals via 3Rs methods.

The 3Rs Alternatives

- **Replacement** refers to technologies or approaches that directly replace or avoid the use of animals in experiments by incorporating [non-animal methods](#) where they would otherwise have been used. Replacement can be broken down into two categories: Full/Absolute and Partial/Relative.
 - Full/Absolute Replacement: Avoids the use of any animals. Examples may include the use of human volunteers, training manikins, tissues and cells, mathematical and computer models, and established cell lines.
 - Partial/ Relative Replacement: Animals are still used to provide tissue, cells and/or organs but experiments are conducted in vitro (tissue culture, tissue slices, etc.). Partial replacement can also include the use of animals that have been slaughtered for meat or euthanized due to other purposes.

3Rs in Ecotoxicity Testing

To regulate new chemical products and pollution from industry and agriculture, government agencies mandate toxicity tests to determine how substances effect the environment. Organizations are prioritizing the development and validation of non-animal testing methods called new approach methodologies (NAMs) to conduct these toxicity tests. NAMs refers to any technology, methodology, or approach that provides information on chemical hazard, exposure, or risk assessment (e.g., "organ-on-a-chip", computer models, *in chemico* assays). On this page find links to research articles and testing tools provided by federal agencies.

New Approach Methodologies (NAMs) in Ecotoxicology

This bibliography provides citations regarding new approach methodologies (NAMs) used in the field of Ecotoxicology. NAMs are non-animal technologies and approaches used for chemical hazard, exposure and risk assessment testing such as in vitro assays, computational models, cell-based models, and organs-on-chips. The bibliography covers peer-reviewed literature published between 2010 and May 2022.

AWIC's Literature Searching Webpage

<https://www.nal.usda.gov/services/literature-searching-animal-use-alternatives>

- Step-by-step guide to searching
- Search examples
- Cheat sheets and worksheets
- Research planning and publishing guidelines
- Frequently asked questions

The screenshot shows the USDA National Agricultural Library website. The header includes the USDA logo, the text 'National Agricultural Library U.S. DEPARTMENT OF AGRICULTURE', and navigation links for 'Ask A Question', 'Contact Us', and 'DigiTop'. A search bar is present with the placeholder text 'What would you like to find?'. The main navigation menu includes 'Home', 'Topics', 'Research Tools', 'Collections', 'Data', 'Services', and 'About Us'. The breadcrumb trail is 'Home / Services / Literature Searching: How to Find Animal Use Alternatives'. The main heading is 'Literature Searching: How to Find Animal Use Alternatives'. The introductory paragraph states: 'The National Agricultural Library's [Animal Welfare Information Center](#) (AWIC) provides guidance on building and conducting a 3Rs (replacement, reduction, refinement of animal use) alternatives literature search. This page details instructions for finding 3Rs alternatives along with other resources to assist individuals working with animals in research, testing, and teaching.' The section 'Why Consider 3Rs Alternatives?' explains that the [Animal Welfare Act](#) (AWA) regulations require principal investigators (PIs)/scientists to consider alternatives to procedures that may cause more than momentary or slight pain or distress to the animals. It also notes that PIs/scientists must provide written assurance that their activities do not unnecessarily duplicate previous experiments. A thorough literature search can identify information to meet these requirements and provide PIs with current research related to their area of study. The 'Table of Contents' section lists: 'Planning a Search', 'Step 1: Identify Areas to Potentially Implement Alternatives', and 'Step 2: Finding Databases and Grey Literature'. The 'Planning a Search' section begins with the text: 'Targeted literature searching provides better results and limits irrelevant citations. Below are steps on how to conduct an alternatives literature search. You'll find guidance on creating targeted questions, selecting databases and other resources, finding keywords, understanding search syntax tools and when to use them.'

NAL's New SEARCH Interface

<https://search.nal.usda.gov/>

- Search all NAL's collections including Agricola, PubAg, and NALDC
- Journal articles, books, dissertations, etc.
- Basic and advanced searching
- Unique resource for 3Rs and New Approach Methodologies (NAMs)

The screenshot displays the top navigation bar of the NAL SEARCH interface. It includes the USDA National Agricultural Library logo and the text 'U.S. DEPARTMENT OF AGRICULTURE'. Navigation tabs are labeled 'NEW SEARCH', 'PUBAG', 'AG DATA COMMONS', 'DIGITAL COLLECTIONS', 'BROWSE', 'JOURNAL SEARCH', and a menu icon. Below the navigation bar is a dark blue search bar with the placeholder text 'Search' and icons for voice search and manual search. The main content area is divided into two columns. The left column is titled 'What am I searching?' and contains introductory text about the SEARCH tool, its access to 8 million records, and a list of search options: Articles, PubAg, and Digital Collections. The right column is titled 'Other Library Research Tools' and lists links to Ag Data Commons, Manuscript Collections, NAL Thesaurus, and DigiTop (requires login).

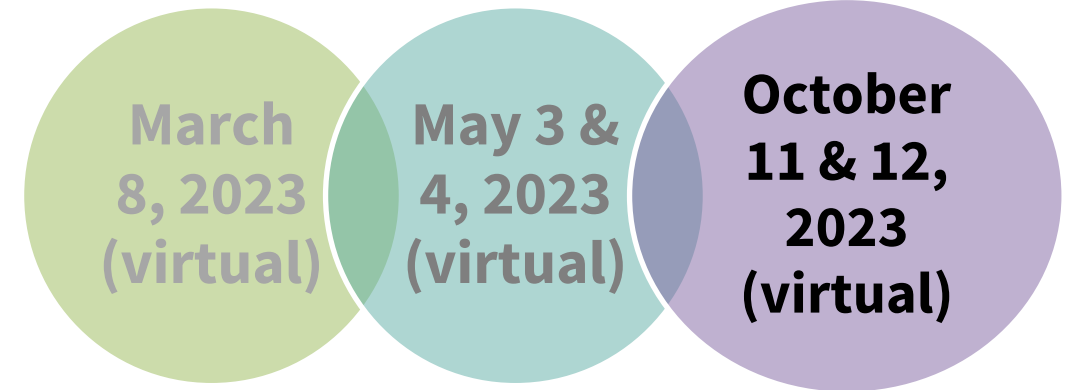

Meeting the Requirements of the Animal Welfare Act Workshop

USDA National Agricultural Library
U.S. DEPARTMENT OF AGRICULTURE

Animal Welfare Information Center Workshop

Learn how to find 3Rs alternatives information
through literature searches!

The objectives of the workshop are to provide:

- An overview of the AWA and its regulations;
- An introduction to AWIC and other 3Rs organizations;
- A review of the 3Rs alternatives concept;
- Guidance for where to find 3Rs literature and resources;
- Instruction on database literature searching techniques (e.g. search syntax); and
- A demonstration of an alternatives literature search.

AWIC's Online Workshop

To register: <https://www.nal.usda.gov/about-us/events/awic-workshop>

Online Animal Welfare Workshop

This online version of the workshop provides an interactive environment where participants can learn about conducting literature searches, the history of animal welfare law and the specific responsibilities of researchers and IACUCs.

Combining the expertise of the AWIC staff and the flexibility of self-paced learning, the online workshop meets the needs of researchers, librarians and IACUC members nationwide.

What You'll Cover

- A historical overview of the Animal Welfare Act (AWA), and regulations
- What is meant by the Information requirements of the Animal Welfare Act (AWA)
- 3Rs Alternatives of Reduction, Refinement, and Replacement
- Databases and resources available to access scientific literature
- A systematic approach to accessing information and creating effective literature search strategies.

Access Anytime!
On-demand and self-paced.

AWIC Helps You PREPARE For Better Science

Featured photo by: Gettyimages

Current concerns about reproducibility in preclinical research make it even more important to plan animal studies properly. Sometimes, finding this high-quality information can be difficult, but AWIC can help with identifying the right resources! AWIC provides information on [searching published literature](#) and resources that can assist with [experimental design](#).

Among these resources are the [PREPARE guidelines](#), created by [Norecopa](#). The PREPARE guidelines are a two-page checklist, containing essential topics that scientists should consider when planning experiments. These guidelines are useful to those looking for the latest resources on how to conduct better science, optimize animal welfare, and improve the reproducibility and translatability of animal research.

Visit the [AWIC website](#) for the latest resources on 3Rs information and technology, or [contact us](#) for additional support.

Animal Welfare Act History Digital Collection

The Animal Welfare Act History Digital Collection (AWAHD) is a full-text, searchable collection that is tightly focused on the history of the Animal Welfare Act (AWA).

You may view an [interactive timeline of Animal Welfare Act History](#) which describes key amendments to the law.

The Animal Welfare Act (AWA) was signed into law in 1966. It is the only Federal law in the United States that regulates the treatment of animals in research, exhibition, transport, and by dealers. Other laws, policies, and guidelines may include additional species coverage or specifications for animal care and use, but all refer to the Animal Welfare Act as the minimum acceptable standard. The Act is enforced by USDA, APHIS, Animal Care. [The Animal Welfare Information Center \(AWIC\)](#) is a Federally mandated program at the National Agricultural Library which provides information on animal care and use topics, including the AWA and its regulations. AWIC supports the Animal Welfare Act History Digital Collection (AWAHD).
