

Journal support for standards-compliant, reproducible NAMs

Paul Whaley, PhD

Editor-in-Chief, *Evidence-Based Toxicology*

21 May, ICCVAM Public Forum

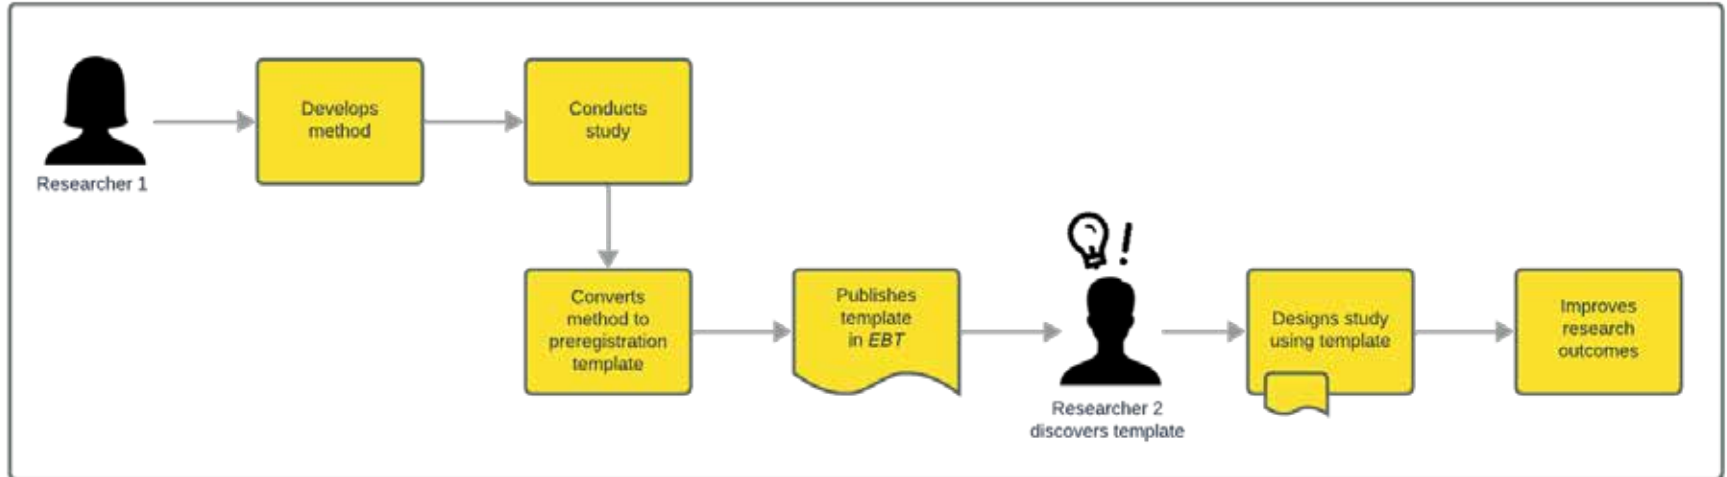

A new manuscript format to support reproducible research

“Preregistration Templates” to help researchers use each other’s methods

Call for papers: <http://bit.ly/EBTprereg>

How it works

Benefits

A pool of re-usable, high-quality, peer-reviewed methods

Lower entry barrier to reusing NAM methods

Improved compliance with research guidelines

Easier validation and testing of reproducibility of methods

Facilitates move toward retrospective validation of methods
