

Scientific Advisory Committee on Alternative Toxicological Methods Meeting

Date received: July 19, 2025

Federal Register Notice: (90FR29572-29573 )

Private Citizen

Comments: "the appointees to this committee must include American citizens who can question the scientists on some of their findings. far too often listening only tot the alleged experts drives the USA down the wrong path. we have all seen that with COVID. science can be crooked, untruthful, dishonest, slipshod. we want american citizens who want to stop abusing animals to sit on this committee. we want animals not longer abused for these tests. use human cells."
