

Attention: Scientific Advisory Committee on Alternative Toxicological Methods Meeting

Date received: September 3, 2025

Federal Register Notice: (90FR29572-29573)

Private Citizen

Comments: "In area of mental health research, including studies of neurotoxin, the ultimate validation of knowledge is through behavioral tests. Behavioral tests cannot be done in tissue or cell cultures, or computational models. Reducing animal research will severely slow down the president's agenda of making America (mentally) healthy again."
